

Downloadable eBooks

- ▶ MRSPL eBooks will eventually be listed in our regular catalog... but the service is actually run through a separate web site set up for us by our eBook partner Overdrive. The page – mrspl.lib.overdrive.com – is linked on our regular library web site as **Downloadable Collection**. Using your MRSPL card number and PIN, you can check out books, place holds, and otherwise manage your eBook account through our dedicated Overdrive site.
- ▶ Overdrive actually provides access to eBooks, eAudiobooks, eVideo, and eMusic. Initially, though, **MRSPL is only purchasing eBooks**.
- ▶ **You can borrow up to 5 eBooks at one time**. However, once you have checked out 5 eBooks, you cannot borrow any more (until one expires or is returned).
- ▶ **You can choose how long you would like to keep an eBook: 7 days, 14 days, or 21 days**. The default (if you do not specify) is 21 days. Some Disney titles, however, may be kept for a maximum of 3 days.
- ▶ Once the borrowing period expires, eBooks automatically deactivate and can no longer be read. **eBooks cannot be renewed *per se***; however, they can be re-borrowed if desired.
- ▶ **You can place holds/reserves on up to 5 titles at one time (in addition to the 5 titles you can borrow)...**but if you already have 5 books checked out and a hold becomes available, you cannot check out the hold unless you return one of the books you already have checked out.
- ▶ **You have 2 days to download a hold once you are notified by email** that the hold is available. If you do not download it within 2 days, that eBook becomes available for others to checkout.
- ▶ When borrowing an eBook, you must first place it in your browsing “cart,” **where it will be held for up to 30 minutes while you decide whether to finally check it out**.
- ▶ **The “standard” format for eBooks is ePub**, which works on most non-Amazon readers (Nook, Sony Reader, iPad/iPhone, Android devices). **Many – but not all – eBooks are also available in a Kindle compatible format**. When you view a specific eBook in our Overdrive catalog, the different formats available will be displayed. You can also search our Overdrive catalog for specific formats (e.g. only Kindle eBooks).
- ▶ You will need an **Adobe ID or Kindle/Amazon ID** to use Overdrive eBooks. You may also need to download the **Overdrive Media Console** or **Adobe Digital Edition** onto your computer or device to access eBooks.
- ▶ Not all eBooks that can be purchased (through Amazon, B&N, Google, Apple etc.) are available through Overdrive because some publishers will not yet sell downloadable eBooks to libraries. **As a result, many current bestsellers are not available in our Overdrive collection**.

Also keep in mind...

- ▶ If you have already downloaded eBooks through other metro-DC libraries (e.g. Fairfax, Arlington, DC), you **shouldn't have any problem using our Overdrive service**. Although different libraries may order different titles and customize/individualize their Overdrive page, the Overdrive processes (searching, borrowing, placing holds) are all virtually identical from library to library.
- ▶ If you have a Kindle, please note the difference between WiFi and Whispernet. Amazon offers free Whispernet, a 3G wireless service, on many Kindles to deliver purchased books. **Amazon, however, will not deliver library eBooks wirelessly to Kindles through its Whispernet network**. Library eBooks must be transferred either by WiFi or, if you have an older Kindle without WiFi, from your computer using a USB cable.

Public Library Books for Kindle (from Amazon):

- ▶ As you browse our Overdrive eBook catalog while logged into your account, you can keep a list of books you might like to read in the future by clicking on the **"Add to Wish List"** option next to each title.
- ▶ In addition to the eBooks purchased by the library, you will have access to over **34,000 public domain eBooks** (which don't count against your checkout limit and don't expire!).
- ▶ With most Overdrive eBooks, **you can change the font size**...effectively making every eBook a large print book! And visually impaired readers may be eligible for Overdrive's free **Library eBook Accessibility Program** (LEAP).
- ▶ **You may not download eBooks onto the library's computers** to transfer them onto your own device.
- ▶ How to download library eBooks from Overdrive to your reader can vary (sometimes greatly) from device to device. Overdrive offers a lot of information to help you! Just look for the large **"Getting Started"** box on the left hand menu of our Overdrive page at mrspl.lib.overdrive.com.
